

The year 2021 has begun and what a year! We will spend more time at home with our loved ones. Therefore, there will be an increased focus on creating the perfect, calm setting of homelike cosiness, where we can enjoy the warm and bright spring and summer days.

In the springtime we prepare our gardens for the summer season, we put flowers and herbs out in pots and baskets, and we look forward to seeing nature bloom again. On a hot summer day, we enjoy a cool drink at a cosy cafe table and relax on a comfortable sun lounger. Tasteful and delicious summer food is prepared, and we spend the bright evenings on the terrace or balcony, in the company of those we care about.

In this year's Spring Summer collection, we take you on an inspiring trip to the garden house and introduce you to the many novelties for the house and garden. The colour palette will spoil us with the finest shades of **pink** inspired by garden berries, as well as shades of **green**, inspired by fresh plants and herbs. We maintain our focus on **natural materials** such as bamboo, rattan, cotton, and linen, and stay aware of the importance of using recyclable materials.

The many novelties such as watering cans in a wide range of colours, rustic lanterns and fine floral quilts, throws and cushions create the perfect spring and summer atmosphere and make a perfect interplay with the rest of the collection.

Enjoy – and see you all again soon!
