

## New Spring'21

### Sunstone & Matcha

Beginning 2021 in a positive and vigorous statement, Porcel will introduce two new collections that will be revealed digitally coming January 18<sup>th</sup>. Sunstone and Matcha are independent sets that come together endorsing hope through color and gold.

Developing new collection during a challenging period of global uncertainty, Porcel felt encouraged to continue innovating, focused on better days and on products that would translate that same motivation and strength.

Sunstone is a full set of porcelain pieces decorated with fine gold lines resulting in a reflective geometric pattern. Resembling a crystal stone with chisel appearance, Sunstone features a kaleidoscopic pattern designed with slim gold lines over each porcelain piece. The name Sunstone stems from the bright metallic pattern that creates an optical effect of reflections. The designation also evokes the medieval use of a Sunstone to navigate and to locate the sun in a completely overcast sky, which is metaphorically appropriate for 2021.

Elegant, sophisticated and following Porcel's identity, Sunstone is a remarkable and contemporary collection that will highlight table moments.

Matcha is a soft green collection named after the Japanese powder made from green tea leaves. With a selection of nine coloured pieces, green is the international symbol of hope. Matcha is also vibrant and optimistic, just as the world wishes this new year to be.

Joining Passion and Apricot collections, Matcha comes in with the same composition, offering clients a selection of three colours for the same pieces so that mixing and matching is made easy. These three options go brilliantly together and are perfect for adding a cheerful mood when paired with other Porcel collections such as Sunstone (new), Golden Orbit or Pantheon.

Sunstone Designed by Filipa Ricardo

Matcha Designed by Porcel Studio
