

Art de la Table : Les Jardins de la Comtesse presents its new collections in bamboo fibre and melamine

Since its creation in 2011, Les Jardins de la Comtesse has been a leader in the picnic and outdoor market. The brand has made a name for itself by offering high quality, aesthetic picnic baskets that revisit the world of the garden in a chic and elegant way.

In 2018, it has enriched its catalogue with the MelARTmine range, a range of high-quality, colored pure melamine tableware.

Today, Les Jardins de la Comtesse presents its new collections, which will brighten up tables outdoors and indoors: the "Toucans of Rio" collection in melamine, and the "Green&Art" collection in bamboo fibre.

Fly to the tropics with "Toucans of Rio"

Launched in 2018, MelARTmine Collection is a collection of pure melamine tableware in shimmering colours. After Jungle, Lisbon, Bali Monkeys and Exotic Flowers, the range continues its world tour with its new theme "Toucans of Rio".

With this colourful crockery with imitation bamboo finishes, the sun and the warmth of the tropics invite themselves to all tables. Toucans and parrots are depicted in lush vegetation, printed in a gradation of blue, white and green.

The service includes everything you need to set a beautiful table: deep and flat plates of various sizes, serving dishes, serving trays, salad bowls, bowls and matching salad servers.

Shock-resistant and virtually unbreakable, this tableware has a shiny, soft-touch finish and is very easy to care for. It is ideal for outdoor tables and poolsides.

By combining aesthetics and practicality, Les Jardins de la Comtesse makes lunches with friends or family pure moments of sharing, conviviality and greediness.

Green&ART: the new eco-responsible collection from Les Jardins de la Comtesse

Green&Art is a line of tableware made of bamboo fibre, an eco-friendly, antibacterial, soft-touch, light and strong material.

Very colorful, it is composed of two collections for adults and two collections for children.

Services for adults

The "Parrots" and "Wildflowers" services are composed of plates, salad bowls, serving dishes and trays, glasses, insulated mugs and storage boxes that can be used for outdoor and indoor meals or chic camping. The salad bowls and dishes are particularly practical for everyday use.

The "Parrots" theme is full of cheerfulness and highlights the flamboyant plumage of the birds. The "Wildflowers" theme is adorned with delicate floral motifs and makes for romantic, bohemian and charming tables.

Two adorable children's sets for baby's first meals

Les Jardins de la Comtesse has thought of the little ones with the Happy Friends collection in bamboo fibre. Designed in collaboration with the French brand LovelyTribu, it features adorable characters: Gigi the Giraffe and Lily the kitten.

The meal sets contain a plate, a bowl, a glass and ergonomic bamboo fibre cutlery; they allow baby to learn how to eat properly in complete safety, and make lovely birth gifts.

Les Jardins de la Comtesse: the chic picnic specialist

Les Jardins de la Comtesse: the specialist in outdoor lunches and chic picnics.

In addition to its Art de la Table ranges, the brand is the expert in chic picnics thanks to its wicker baskets with elegant and refined designs that come in several sizes.

Each basket contains everything you need to make beautiful picnics for 2, 4 or 6 people.

The wicker is hand-woven in certified eco-friendly workshops. To accompany the picnic, Les Jardins de la Comtesse offers other equally refined products: cotton tablecloths with waterproof lapels specially designed for outdoor use, scarves, stoles and plaids for slightly cooler meals.

About Les Jardins de la Comtesse

Les Jardins de la Comtesse was founded in 2011 by Florence and Arnaud de Rességuier. The brand draws its inspiration from the large family estate where Arnaud's grandmother loved to receive her friends and family. This colorful character reigned in her kitchen and orchestrated memorable picnics in the middle of the woods.

Arnaud inherited his passion for gardens and beautiful things from his grandmother and wanted to honor the French art of living. The brand quickly positioned itself as the specialist in outdoor lunches.

In 2018, it launched its first range of tableware, and continues to regularly offer aesthetic and high quality novelties.
