

MORE WARM MOMENTS ON THE PATIO

The HeatUp patio heater from Eva Solo is now also available as a discreet wall-hung model that is an effective source of heat when the spring sunshine entices the family outside. The electric, eco-friendly patio heater is up to 10 times cheaper to run than a traditional gas patio heater with approx. 33% fewer carbon emissions. HeatUp is designed to transmit the heat downwards to everyone gathered around the table, and the temperature can be adjusted by remote control.

Wall-mounted HeatUp patio heater

Extend the summer season by turning up the heat on the patio on cool evenings. The discreet wall-mounted HeatUp patio heater provides optimum and directional heat and is easy to operate. Select between 825, 1,650 and 2,500 W using the accompanying remote. The innovative ULG+ heating lamp emits a much more pleasant light than we were used to in the past. The patio heater reduces your carbon footprint compared to gas heaters as it is electrically powered, with the added bonus that it never runs out of fuel. For using in all types of weather throughout the year.

- Made of aluminium and silicone.
- Dimensions: 88 cm.
- **Price: 499,95 EUR.**
