Elifle Enamelware

# ABOUT US

... with past and future but keep standing in the center of today

The manufacturing story starts with our father's decision to manufacturing something reflecting our culture and history. That's a story of recreation for enamelware kitchenware in forms of today; in the last decade.

We keep in touch with past and future standing in the middle of today with our designs featured for todays' requirements while being respectful to the roots of elder generations.

As a family owned factory, we are proud to be one of the leading manufacturer family to renovate that traditional old product with modern and colorful designs and to introduce again which was about to be forgotten. After have been manufacturing under many private labels; now going one step forward; we are happy to launch our own brand "Elifle".

Founded in 1992 as a steel kitchenware manufacturer and has become a 100% enamelware manufacturer since 2002, the family is now proud to be followed by the second generation with Elifle Enamelware as the export company, with an aim of setting up a worldwide brand name with specific; designed Elifle Collections.

'Elif' is our granddaughter's name.
