The Bokashi Organko composters are a convenient solution for everyone who wants to preserve a healthy and green environment by acting responsibly. For many years now, Skaza's sustainable composters have been a superstar among people who **live a zero-waste lifestyle, responsibly treat organic waste and want only the best for their ecological urban gardens**. Bokashi Organko composters are an ultimate design with their purpose, functionality, customer experience and appearance. **They help users reduce the amount of organic waste by up to 25%**, thus reducing the carbon footprint, including a decrease in the amount of biowaste that generates savings in the collection and management of this waste.

BOKASHI ORGANKO

Bokashi Organko composters are the most effective sustainable solution for composting organic waste and ecological gardening. Adding efficient microorganisms **accelerates the decomposition of waste without rotting and unpleasant odours**. The composters provide the fermented basis for high-quality compost, which is used to cultivate plants in the home and garden.

BOKASHI ORGANKO 2

The ultimately designed kitchen composter is designed for a zero-waste lifestyle and urban ecological gardening. A new-generation kitchen composter that has received many awards fits into every kitchen with its top-notch design. This is precisely why we can use it in the most convenient place - right on the kitchen counter!

BOKASHI ORGANKO 2 OCEAN

The latest creation represents a more sustainable lifestyle for our end-users: Bokashi Organko 2 Ocean, the successor of our design-winning Bokashi Organko 2. It is even more sustainable, as it takes the waste from nature and returns to it with quality compost, full of effective microorganisms that feed the soil and make it even more fertile. It is made from hand-picked and recycled fishing nets; it is a solution that our environment needs. For every product sold, we donate 2 EUR to ocean cleanup.

AWARD 2019
WINNER

The Bokashi Organko 2 is made of recycled materials. You take care of the waste in the most beautiful and convenient way right where it is generated - in the kitchen! **The Bokashi Organko 2 has already received several distinguished international recognitions. Because of its winning design, we decided to go even further - a brand-new composter Bokashi Organko 2 Ocean kept the design and it can be found in a new color: black.**

The most prominent among the awards are two: **Solutions 2019**, awarded at the largest consumer goods fair in Frankfurt, Ambiente 2019, and the prestigious **Red Dot Award for product design**. It was also selected as a winner of the prestigious **Big SEE Product Design Award 2019**.

BOKASHI ORGANKO 2 – the best kitchen assistant turning organic waste into nutrients for your urban garden

The **Bokashi Organko 2** composter is an integral, sustainable solution for a zero-waste lifestyle and urban ecological gardening. With this kitchen composter, you can easily produce a first-class basis for compost, fertilizer for your urban garden and a natural detergent for drains.

The valuable **micro-organisms** contained in the **biogenic granules** trigger **fermentation**, thus conserving **most of the nutrients and minerals**. The Bokashi Organko 2 is **impermeable to odours** and **does not attract insects**. It is made of **recycled**, environmentally friendly materials. **Its state-of-the-art design** means you can place it in the **centre of every kitchen**.

The Bokashi Organko 2 will provide you with:

- > a first-class basis for compost,
- > organic plant fertilizer,
- > natural detergent for drains.

1. COMPOST BIN

2. BIOGEN SPRINKLING

Discover the high-end shape of the next generation kitchen compost bin.

The Bokashi Organko 2 kitchen composter is an integral solution for a zero-waste lifestyle and urban ecological gardening.

With the Bokashi Organko 2, your kitchen becomes a place of green thinking. Recycled biowaste from households is collected less frequently, while the quantity of organic waste is reduced by 25% due to fermentation. Since no bags are needed for biowaste, and since the processed waste can be used to cultivate plants, the purchase of the Bokashi Organko composter is repaid many times over in less than 1 year.

The Bokashi Organko provides households with the following advantages:

- > zero-waste lifestyle,
- > reducing the amount of biowaste in households by up to 25%,
- > the possibility of urban ecological gardening,
- > the circular management of organic waste at home,
- > a reduction in the carbon footprint of each household.

IMPERMEABLE TO ODOURS

SIMPLE USE WITH ONE HAND

MAKE THE BASIS FOR COMPOST

THE FERMENTATION LIQUID IS USED AS A FERTILISER OR AN ORGANIC DETERGENT

HANDLE GARDEN AND OTHER BIOWASTE RESPONSIBLY

The **Bokashi Organko** composter is an **integral, sustainable solution for biowaste and ecological gardening**. It is the best choice for people who are aware that their actions always have an impact on the environment and manage organic waste in a responsible way. They do not produce waste but resources for new cycles of life. Organic waste is Food for soil where even grows even better thanks to efficient microorganisms.

> **New colour shades of the BOKASHI ORGANKO: cappuccino-white and olive-white.**

#ZEROWASTE

BOKASHI ORGANKO – an assistant turning biowaste into ecological fertilizer

This composter enables you to easily produce a **first-class basis for compost and a fertilizer for your ecological garden or house plants**. The valuable micro-organisms contained in the biogenic granules trigger fermentation, thus conserving most of the nutrients and minerals. The Bokashi Organko is impermeable to odours and does not attract insects. It is made using recycled, environmentally friendly and safe materials.

The Bokashi Organko will provide you with:

- › a first-class basis for compost,
- › organic plant fertilizer,
- › natural detergent for drains.

1. COMPOST BIN

2. SET OF ACCESSORIES

3. BIOGEN SPRINKLING

The effective investment for green households, which returns quickly.

Thanks to the comprehensive solution of Bokashi Organko, we take garden and other biowaste out of the household less frequently. Since composters do not need organic waste disposal bags and since the processed waste can be used in cultivating plants, the purchase of a Bokashi Organko composter is repaid several times over in less than 1 year.

- › One composter or a set of two composters is suitable for households where organic waste is disposed of in a waste container, as well as for households with their own compost containers or gardens who want to take advantage of the fermentation process.
- › The composter reduces the volume of organic waste by 25%.
- › It is made of environmentally friendly and safe materials that can be recycled.
- › It is suitable for people who want to handle organic waste responsibly, live according to the principles of a zero-waste lifestyle and are committed to organic gardening.
