

## **Tailor made Milano Bedding for contract and unique residences**

**Milano Bedding**, for almost 25 years, with the comfort and design of its sofas, sofa beds and beds, has **offered concrete solutions to specific needs**. The collaboration with architects and interior designers over time has become increasingly close, to create **unique and tailor-made projects**.

Both in the residential, where customization mainly involves the covers, and in the contract, where the needs can be the most different, **the company offers all its know-how for specific project management**.

Milano Bedding has an organization suitable for all levels of complexity, from special furnishings to interior fit-outs of hotels, aparthotels, hospitals and cruise ships.

This is the case of the completely tailor made project created for the **Kongress Hotel Davos Platz in Switzerland** and designed by the architect Alexander Wilhelm. Here, for the restyling of the rooms, the Haiti bed has been specially integrated with a customized headboard; in addition, a special ottoman has been made to design.

The **custom made headboard for the Haiti bed**, featuring a vertical striped quilting, was covered in taupe color imitation leather, in harmony with the design and the warm and soft colors of the rooms.

According to the needs of the different rooms, the headboard was designed to measure, becoming very scenic in the version that extends from the bed, covering and decorating the entire wall: from the floor and up to 54 cm in width, making the environment immediately unique and recognizable. Same style but smaller dimensions for the other two versions, one that embraces the bed and bedside tables and the other behind the pillows.

To complete the furnishings, Milano Bedding has created a coordinated rectangular **ottoman** with rounded corners, in several dimensions to adapt to the space.

As declares Roberto de Lorenzo, owner of the company: *«uniqueness is becoming a rule of contemporary living. Customers and designers express a remarkable appreciation for our ability to customize. Our company organization and a totally made in Italy production allow us to face every need in a tailored way».*
