

Le Gocce

From the collaboration of Andretto® Design with L'Essenza nel Marmo®, an innovative creation is born: charging base for smartphones, which combines the craftsmanship of Murano glass, the characterizing essence of marble and high technological value.

This union, enriched with elements such as pure gold and platinum, transforms a practical element of daily use into a veritable jewel, unique, elegant and highly customizable.

"Le Gocce" are created entirely by hand, with attention to every detail.
