

LES  **CHARITY** 
BOUGIES
DE NY[®]

In 2017, we created
LES CHARITY BOUGIES,
a virtuous brand.

LES CHARITY BOUGIES DE NY[®]

Our concept is unique and virtuous because we are the only artisanal candles maker to make collections of candles from recycling objects, all unique pieces, sustainable. It is virtuous with men because the sourcing of our containers is done only in sales of charity, every day and everywhere in France.

Finally, and this is a very important point for us, it is healthy for consumers because our waxes are vegan, no scented, uncolored.

Our candles are cast in objects of a strong character after which we imagine stories that we tell our customers, this that they love. We choose media from all materials and all styles as long as they are beautiful : all metals, porcelain, ceramics, glass, crystal, stone and even wood.

To ensure more durability, our workshop carries out the refurbishment candles sold.

In France, our customers can deposit their candle in the store where they have it purchased or drop it off directly to the workshop.

We also set up pouring on measurement in our workshop. Customers bring the objects they love and we transform them in candle.

Our waxes can be washed off with hot water. The containers are thus easily reusable.

Our collections of unique candles are in porcelain, ceramic, glass, crystal and all tableware metals (stainless steel, pewter, silver metal, brass, yellow and red copper, bronze, regulates, aluminium, iron...).

We offer our candles in 5 sizes from S to XXL.

Our customers are shops, concept stores, department stores, florists, restaurants ...

We also work with decorators, interior designers, stylists.

To Summarize.

- Our concept is unique because it is virtuous with people, with the planet, with your health.
 - Solidarity sourcing
 - Manual overcycling in France (Boulogne Billancourt)
 - French or European vegan wax casting without GMO, without any health risk (no additives, perfumes or dyes)
- Our candles are offered in sets of unique upcycled pieces for a “collection of curiosities” effect.
 - 5 sizes from S to XXL
 - 3 main families of materials: Metal, porcelain / ceramic, Glass / crystal.
