Bisaccia sarda and Nordic design

We delight to present our new collection **Bisaccia** of the handmade bags and lifestyle items. In the new collection Bisaccia of handmade bags and lifestyle items, the designer's philosophy is evident, combining traditional craftsmanship with modern design. The strength of this line is the mix & match of materials: the Bisaccia fabric, whose use is of ancient origin and closely linked to the traditions of the past of Sardinia, and genuine leather made in Tuscany with a soft texture. The collection is as classic as it is practical, perfect to accompany you everywhere, from museums to shopping and any urban adventure.

The collection designed by Finnish designer Elena Kihlman in her Atelier in Rome.

The development and production is all done in Italy/Rome and we believe that these it's a requirement to ensure their quality.

We invite you all to see our collection and explore Elena Kihlman.

We hope you love our creations as much as we do, and we look forward to hearing your feedback.
