

LIGHT AND SHADE

Launching this summer, the Fin King table light marks a new direction for Original BTC, combining the British manufacturer's trademark bone china with the addition of a drum shade. A first for the brand, the ivory linen shade casts a soft, diffused light, creating beautiful shadows on the intricate base.

Also available in Queen size, the Fin's base is hand slip-cast in Stoke-on-Trent using a complex eight-piece mould. Liquid clay, or slip, is poured into the mould and allowed to set, then the segments are separated to reveal the ribbed form, ready for firing and glazing. The Fin is finished with lacquered, brushed solid brass details and signature cotton braided cable in a pale grey, while the shade sits on an angleable ball and socket to facilitate reading.
