

WELCOME

This limited AW- collection is special in many ways. It is a "heart project" and goes by the name "Together we are stronger". In 2020 I got a call from Josephine Touray from FANT (Football for a new tomorrow) who asked if I was able to donate thermobottles for their projects in Africa. I immediately feel in love with the work they do: trying to make living conditions better for children in Sierra Leone using sport as a platform. The work FANT does is setting up and running Football and Handball clubs in Africa and at the same time teaching the children fundamental human rights - it is simply admirable and they have my deepest respect. I am a mother of three children who have been doing sports most of their lives and I have seen how much joy it has brought my children along with healthy life long friendships. I really felt that I wanted to do more than I was able to by myself.

The idea to make it a joint project between customers, retailers, distributors and ambassadors came about. If everyone would contribute - we would be able to do so much more. So this years new line of Thermobottles is dedicated to FANT and the work they do.

A special thanks to Danish national players Kristina Jørgensen, Martin Jørgensen, Mathias Gidsel, Mette Tranborg and Sanne Troelsgaard for your support and taking the time to participate in our video explaining our project. You can watch video here:

We hope you will join us.

Together for a better tomorrow.
