## The Company.

**creating rugs for the family,**

**fitting a modern lifestyle,**

**respectful of the environnement.**

Ten years ago, Emmanuelle Toché was guided by her desire to create a house brand specializing in rugs. Around values such as family, encounters and authenticity, the designer develops a reassuring and embodied universe, intended to inhabit beautiful interiors. From the start, its customers were quickly seduced by its colorful brand environment and its pure forms, combining utility and aesthetics.

AFKliving rug collection fits all types of modern apartments. Each of its collections referring to a trip is linked to ancestral know-how. (Belgium, India, Morocco, ...) The feeling of well-being and happy mood is characteristic of the brand. The intimate and warm atmosphere that emanates from it has the particularity of comforting and providing conviviality.

AFKliving creates various collections aimed to different usage and purpose while purchasing a new rug: there are unique pieces made by hand, real works of art that can be passed down over several generations. On the other hand, they are objects linked to everyday life accompanying family day to day life and play, even in children's rooms.

Using environmentally friendly materials to give pride to the creation, the house spirit blends into the Scandinavian Hygge spirit that focuses on comfort, family and well-being.

Almost a philosophy of life ! All at affordable prices.

Discover our new collection that we created with passion !

## zoom on the creator

Emmanuelle Toché has always evolved in an artistic environment. The branches of her family tree are hung by painters, musicians and ardent collectors of carpets.

"Teenage girl, I wanted to create, draw, be an artist!". A little girl's dream that she will not forget. In the first part of his professional life, Emmanuelle is moving towards marketing and communication, embracing, during fifteen years, a career in large companies around the world. She lives in Asia, India, the United States. Her interest for Art and Creation grew bigger while discovering local crafts.

On her return, the Globetrotter discovers a new planet by becoming a mother. "I wanted softness, simplicity, harmony including in the decoration of my home."

This change of life prompts her to abandon her former profession "Thanks to this past experience, I have been able to combine my artistic fiber with the ability to manage a company." Then, she started creating rugs for kids and their parents..

The sources of her inspiration? Her travels, her penchant for art, design, Scandinavian decor and Paris where she was born. What matter most? "Wellness, family Cocoon and zero stress."

## Custom made / berber rugs

### HANDMADE BERBER RUG MADE IN MOROCCO

Our berber rugs are made in the Atlas Mountains in the heart of Morocco.

These tribal rugs are made by women from Berber tribes. The main raw material is the wool of a particular sheep. A breed with the characteristic of being small in size and very robust. The manufacture of authentic berber rugs requires a great deal of know-how passed down from generation to generation and a lot of patience.

Select the design that you like from our collection or from your own design bank. Any size is possible. Our artisans will then carefully produce your custom made rug in 10 to 16 weeks.
