

EARTH WIND AND FIRE

Do you remember... Once again, the year starts for us somewhere in autumn. Maybe it's a bell that rings in our heads starting from our childhood, maybe it's biological rhythm - however. September in the year circle will always stay for us a point of new start, discovery and improvement.

It does not matter how old we are – turns out that in any age we find new sources of inspiration. Unknown force pushes us to go forward: someone start to dance salsa, someone picks up oil paints and canvas, someone plunges into marathon... And curiously enough at that precise moment we discover in ourselves a talent hidden deep inside. And it makes us happy, it wakes us up, it makes us fly.

For instance, who could ever imagine that such a thing as rug could be created based on the Metaphysic theory or Architecture history. Talented team of Tapis Rouge has proved that it is possible – and 2 new stunning collections confirm it.

In the end of the day it's all about September.

Dream, create and fly
