

THE NEW EXCLUSIVE PARTNERSHIP WITH MEILLART

The new Parisian e-commerce dedicated to the "savoir-faire" of craftsmanship talents chooses Francesca Colombo, who for the launch of this partnership has created in exclusivity an unprecedented collection of coordinated porcelains and wallpaper, reinterpreting in a modern and feminine key the chinoiserie exhibited at Villa Reale in Monza, (Italy): a place that Francesca used to visit during her childhood and of which she strongly underwent the fascination.

Meillart's mission wishes to go against the trend with the consumerism of the current era by privileging the work of artisans who use their unique skills and abilities in producing less but better, in creating objects that have a history, objects destined to pass through time, without suffer the effects.

"Birds song": a porcelains and wallcovering collection

From the partnership with Meillart comes "Birds Song", a collection of porcelain and wallpaper in the "conversational" style, where elegant wild birds hide among delicate and intricate foliage in the soft shades of blue, terracotta and dusty green.

Made with the hand-drawn "pointillism" technique, each precious scene, which required more than four hours of work, becomes a real work of art.

The same concept is also applied to the wallpaper, available in blue, forest green or warm rust tones.
