

BODY the new collection of **MINI art for kids**

◀ Perhaps the deepest desire of every artist is to confuse or merge all the arts, just as things blend in real life ▶ Man Ray

MINI art for kids presents the new BODY collection inspired by Man Ray's surrealism, celebrating an enchanted, ironic and fun world.

A project capable of accompanying children in the discovery of the five senses and the anatomy of the human body: the dream merges with reality, opening the doors of emotional intelligence.

Mouth, Eyes, Nose, Ear, Hand and Skull: six works of visionary sweetness made by carving and overlapping 4 layers of hypoallergenic and anti-mold felt, designed to let every child play in total safety and to decorate any environment.

MINI is the first ever line of TACTILE paintings. The structure of the works allows you to create voids and solids to be explored with your fingers: perfect for the sensory and linguistic development of the little ones, but also suitable for the game of the older ones.

All the works are entirely made in Puglia, with love by hand and it is possible to choose between various sizes: XXS, XS, Small and Large.

You can follow the evolution and history of the project on Facebook on the MINI art for kids page and on Instagram on the @mini.art.for.kids profile
