

Sol&Luna presents at Maison et Objet the Tour Eiffel lined in leather by its craftsmen

Paris, March 2022.- Sol&luna presents a replica of the Tour Eiffel entirely covered in black leather and hand-stitched in red thread. A unique piece of 1.65m high and 56cm in diameter that demonstrates once again the Art of Leather of this Spanish company.

The love of contemporary craftsmanship and design results in a fascinating piece. With a wooden base it has been transformed by the hand of Sol&Luna into a piece of design united with the "Art of Leather".

The meticulous craftsmanship of Sol&Luna with top quality leather has turned it into a warm and avant-garde object. Highlighting the cross stitch with red thread that borders all the pieces.

It has been a very laborious job due to the number of holes in the piece," says Carolina Sánchez de Movellán, CEO of the company. "In addition, we wanted to present a unique piece with a special tribute to the city of Paris and the result has been spectacular".

Sol&Luna: A firm commitment to leather and luxury craftsmanship. This is how we can describe the work of Sol&luna, a Spanish firm that has crossed borders with its leather-covered objects and furniture.
