

With beautiful four seasons in Japan, we learned to sense and appreciate sensitive transition of each season in many ways from the ancient times. Crop calendar called "Shichi-jiyuni Kou" (72 season or 72 period) is a beautiful phrase to describe sensitive changes of each season such as the growth of plants, activity of animals and changes of weather.

Our new collection was inspired by this beautiful phrase.

MARUMITSU POTERIE invites you to join this seasonal celebration through your dining table.

KASHIWADE - summer solstice -

Characterized by its gently warped rectangle shape with four short feet. Subtly undulating form results from the original mold made by clay slab building. Experienced craftsmen manually put traces of an iron comb on the exterior clay.

Check our [MARUMITSU POTERIE](#) page for more!

TESORO - ripening of plums -

Which means "treasure" in Italian. We hope Tesoro will become part of your treasured memory of special dining experience.

Clean wide rim and soft curve leading to small scoop in the center is the feature of Tesoro. With luxurious wide rim, Tesoro can set a special atmosphere for any menu used on this plate. We hope Tesoro will become your inspiration for wide range of menus from hors d'oeuvres, appetizers to desserts.
