LAUNCH OF OUR NEW REUSABLE LINE OF PRODUCTS

La Savonnerie Royale is proud to announce the release of their recent concept combining luxurious natural products that are also respectful towards the environment.

Our new containers are made up of a reusable glass bottle accompanied by 1-liter of our hand soap found in eco-refill bottles available in the fragrances Poudre de Riz, Petales d'églatine, Le Bassin de Neptune, and XIV.

Our 1-liter hand soap eco-refills make it possible to reduce the quantity of plastic used by four. Made from recycled plastics, they are also recyclable.

La Savonnerie Royale is committed to no longer using single-use plastic packaging by 2025.

For the exceptional gold enamel decoration found on each of our bottles, we work with a French company renowned for its excellent "savoir-faire".

The glass bottles are available empty or filled with our XIV fragrance.

Our hand soaps are carefully created in Grasse, France, the perfume capital of the world, and are composed of olive and coconut oils.
