

PRESS RELEASE

STEP INTO
LASKASAS WORLD
AT MAISON ET
OBJET 2023

AN HOMAGE TO TRUE ICONS

LASKASAS®

Laskasas is happy to announce the brand's presence at **Maison et Objet**, becoming a regular in Paris since 2019.

With the usual expectation simmering along the tradeshow preparation months, the thirst for presenting something amazing to visitors is enormous and gives us the necessary strength and vision to have Laskasas in its best version at Paris Nord Villepinte.

Every brand is made of icons, and Laskasas is proud of its own. As such, in this edition of Maison et Objet, the focus will lay on everlasting designs that merge with Laskasas identity and represent the Portuguese brand in every corner of the world.

From January 19 to 23, do not miss Laskasas presentation at Hall 6, Stand G102 – H101, and get lost within our fully furnished entrance hall, living room, dining room, and meeting room.

The power of **the First Impression**

The entrance hall sets the tone for the rest of the house, and this is why one should never neglect it.

In Paris, to comply with this premise, Laskasas chose **Jill console** as the main piece for this space - a stunning Verde Issorie marble design, thought for luxury spaces, in a straightforward one-piece structure.

To have the most spectacular entrance, three more elements were added. The **Tanny mirror** is a beautiful piece made of metal whose structure sustains a circular mirror in the middle – a true beauty to modern abodes. The Bur pouf works as a wonderful complement to the setting with its elegant lines and deep buttoning technique, which gives a special touch of sophistication. Closing with light, after all, we're in Paris, the **Clarke table lamp** bears a striking look of pristine exclusivity and provides the ultimately needed premium touch to the space.

Thought for Gatherings and Comfort

The place to gather family and friends has one mandatory rule – comfort! But Laskasas offers more.

This living room is the epitome of comfort and elegance, a place where feels good to be. Two **Wellington sofas** grab all the attention with their convex back and smooth rounded edges like the 2023 interior design trends require – a big yes to curves!

Also following this cocooning trend, two **Ambrose armchairs** provide majestic seating while offering a sense of sophistication. Among many other outstanding designs, we really need to bring the light to **Rick TV cabinet**. This one-of-a-kind piece is somewhere between functionality and beauty and works wonderfully in living rooms and bedrooms.

Unity and Power Around the Table

The dining table plays an important role in a family home and will continue to do so for many years. It's a place of union where people bond and empower one another while having everlasting and meaningful conversations.

At the core of it all is the dining table - a symbol of togetherness where family and life are celebrated. For this important task, Laskasas chose **Ann dining table** - a glamorous piece for dramatic spaces. Ann flaunts a cylindrical-shaped base that adds a refined twist to this timeless table, contrasting with the oval countertop made of Carrara marble.

However, with no chair, there's no dinner. To match such a superb dining table, an equally superb dining chair is required. You already met it as an armchair, now it's time to experience the ultimate comfort of the **Ambrose** as a dining chair.

A Dining Table that **Close Deals**

At Laskasas we value spaces where great minds discuss great matters. As a result, we strive to inspire and nourish ideas for setting up a meeting room or office space at home.

With a plethora of premium dining tables such as ours, it would be cluelessness from us not to use them in spaces like the above-mentioned. Knowing the symbolism that dining tables exhale, as explained before, we want to transport those same feelings to business. Our choice for this challenge was the **Cheryl dining table** paired with one of the most wanted chairs of the brand, the **Dale chair**.

To do this, and keep it professional, make sure you choose the following right: materials, size, and fitting into the scene. The rest will flow naturally.
