Spring/Summer23

kreatfunk - SS23

Welcome to a new season

A new year, new beginnings. And new, stylish Kreafunk design icons.

As always, we strive for perfection in every aspect. Also, when it comes to being kind to our planet. We are constantly working towards being – if not *the* greenest, then at least one of the greenest tech companies around.

We've already taken significant steps in this direction with our Care series. We've also switched to 100% recycled plastic production, boxes in 100% recycled paper, soy ink printing, and textiles made from 99% recycled plastic bottles. In addition, from 2023, our import transport will be CO2-neutral as we use biodiesel.

The SS23 launch is our second collection made from 100% recycled plastic.

In this issue

Meet our newest member of our Care family: The Stone series. With the Stone range, we've looked at other natural materials to use and found that 'Stone' lives up to our high standards.

Made from fibre-concrete, it has a natural, authentic eco-friendly substance that is kind to the planet. Like nature, each product is unique and has its own expression. The surface is rough, with a Kreafunk signature soft touch and will, in time, achieve a unique patina. It hasn't had any surface treatment or chemistry, so its use and surroundings will naturally affect the material.

We're introducing 3 products in the Stone range. Two speakers and a charging pad. All are available in soft sorbet colours.
