RAW MATERIALS AMSTERDAM X CHARLOTTE S. GAVET

Together with French designer **Charlotte S. Gavet** we present a brand-new lighting collection. We proudly show you our **Terra collection**, made from terracotta and inspired by organic shapes. Charlotte S. Gavet comes from Paris, but nowadays lives in Bali.

The base material of terracotta is clay, which is a naturally occurring material from the area. Another name for terracotta is 'baked earth'. The designer works closely with local craftsmen who make all the lamps by hand with their traditional skills.

The new Terra lighting collection compliments our other collection items made from natural materials.

We can't wait to show you all our new lamps in the upcoming edition of Maison et Objet. You can find us at: **Hall 5A, Stand N76 - O75**.
