LAFUMA MOBILIER's collections of outdoor furniture stand out for comfort, quality, design and the technical achievements always looked for when launching a new product.

Miami II sun loungers like the Maxi Transat Plus Chilean illustrate this perfectly. To complement your moments of ease, go for seated relaxation with the Maxi Transat Plus or enjoy a lying position with the Miami II. Nothing is left to chance and this is demonstrated in the details: large width frames, highly resistance materials, removable fabrics, replaceable elastomer fittings, various positions, adjustable and removable head cushions, protection pads. Miami II even offers a version with a higher seat for yet more comfort and ergonomics as well as a Batyline® fabric storage space under the seat!

But the other unquestionable appeal of the Miami II and Maxi Transat is the BeComfort® mesh padding covering them, a real eco-responsible technical innovation that is super comfortable. This padding has low environmental impact thanks to a 3D net fabric without post-treatment. The dye-coloured threads of the weave also give it excellent resistance to UV and weather. The features that make it the outdoor textile par excellence also make it just right for indoors thanks to its unrivalled comfort.

The padding combines three «technical layers»: 3D mesh, polyester wadding 4 cm thick and Batyline®. Its very textured appearance gives an ultra-graphic touch to the seats, reinforced by the 4 colours available: Ink Blue, Dark Grey, Silver and Olive.

Whether you choose the deckchair version or sun lounger, the BeComfort® collection will delight all lovers of good design, with no compromise on comfort and durability as these products are all labelled Longtime®.

Manufactured in Drôme, France.

5 year guarantee.
