---

**In a world in perpetual motion where everything moves and transforms, Hélène Siellez, artist of the material, invites us to question ourselves on this whirlwind through unique works in paper.**

Since 2015, Hélène Siellez has been transforming materials and colours into original creations based on a model of revaluation. She leads us to reflect on the idea of everyday life and on things that are neglected or sometimes futile, but which are witnesses of the unstable and moving world that surrounds us. She evokes the movement of our societies as an intertwined rhythm of full and empty spaces, opposing continuity and discontinuity in a labyrinthine manner. The viewer is drawn by a physical movement to lose himself in networks and details revealed as we go along. Easily transported by the aesthetics and ethical commitments of the work and the artist, lovers of art and unique pieces will be able to easily integrate the productions into decoration and scenography projects. 100% French, handmade and produced in a Breton workshop near Lorient, Hélène Siellez's creations are for sale all year round on the [www.mom.maison-objet.com](http://www.mom.maison-objet.com) platform.
