

# BLACKstone

# BLACKstone

**Slate**, which has the same density as **marble** and granite, is the **only stone** that can be worked in **thin thickness**.

It retains **its properties** without the **inconvenience of weight**.

**Aged 400 million years**, this **natural material, noble and sustainable**, is used **raw**.

**indoor/outdoor**.

It is **waterproof, does not freeze**, and **does not change color**.

It **reflects the light, each slate is unique**.

The workshop **has specialized** in this material since **2008**. **Everything is handmade** and **can be made to measure**.

Our **know-how** is **unique** and our **designs exclusive**.

**No waste**, cutting chips and scraps are reused for new creations.
