VICAL presents its new catalogue *Natural Luxury*

Spaces are changing. In the era where we search authenticity in the places we live and find value in the spaces we build, VICAL presents its new furniture and decoration catalogue: Natural Luxury.

The essence of the catalogue is based on the emotion, on the fact of providing the spaces with emotional values that join our senses; because now being surrounded by beauty is no longer enough, we need more. In this context, VICAL is aimed at shaping the spaces so that we can feel that sense of belonging to those spaces, building a silent intimacy with the interior design.

This new catalogue uses traditional techniques that have been passed down from one generation to another to create unique and beautiful pieces, elegant and organic, with stories that we would like to hear. Beauty without ostentation is a luxury offered by nature. Our products which have been built from recycled and sustainable wood as well as other natural materials reflect that approach. Calmness lies on the shapes that we propose and is transmitted by the materials that we use.

Spaces are changing and together with them our need of connecting to the authenticity and of finding that luxury that instead of screaming it just whispers. "In VICAL we strongly think that the real luxury is found in the details, in the craftwork and in sustainability", said José Boluda, VICAL home manager. "At the end of the day what we want is to feel the sense of belonging to a space that connects with our essence and that we value".

VICAL invites you to explore this new online catalogue at vicalhome.com, and to immerse yourself in a design experience where nature and luxury converge in perfect harmony.
