OUR PRODUCTION

LOCAL PRODUCERS

We take great pride in our commitment to working hand in hand with local producers and suppliers.

By fostering strong partnerships within the community, we are able to bring you a wide range of products.

NATURAL MATERIALS

We're committed to sustainability, using natural, ethically sourced materials like seagrass, water hyacinth, rattan, bamboo, cotton, shells, and wood in our designs.

HOME INDUSTRY INDONESIA

Our products are handmade by local artisans.

Indonesia is well-known for its 'cottage industry': handcrafting that is done by the local community, in which suppliers mobilise their family or village and everyone has their own specialty.

This has created a flourishing economy, leaving family values and cultural practices intact.

This cultural practice ensures that every item is one-of-a-kind, carrying its own unique story and character, making our products truly special and meaningful.

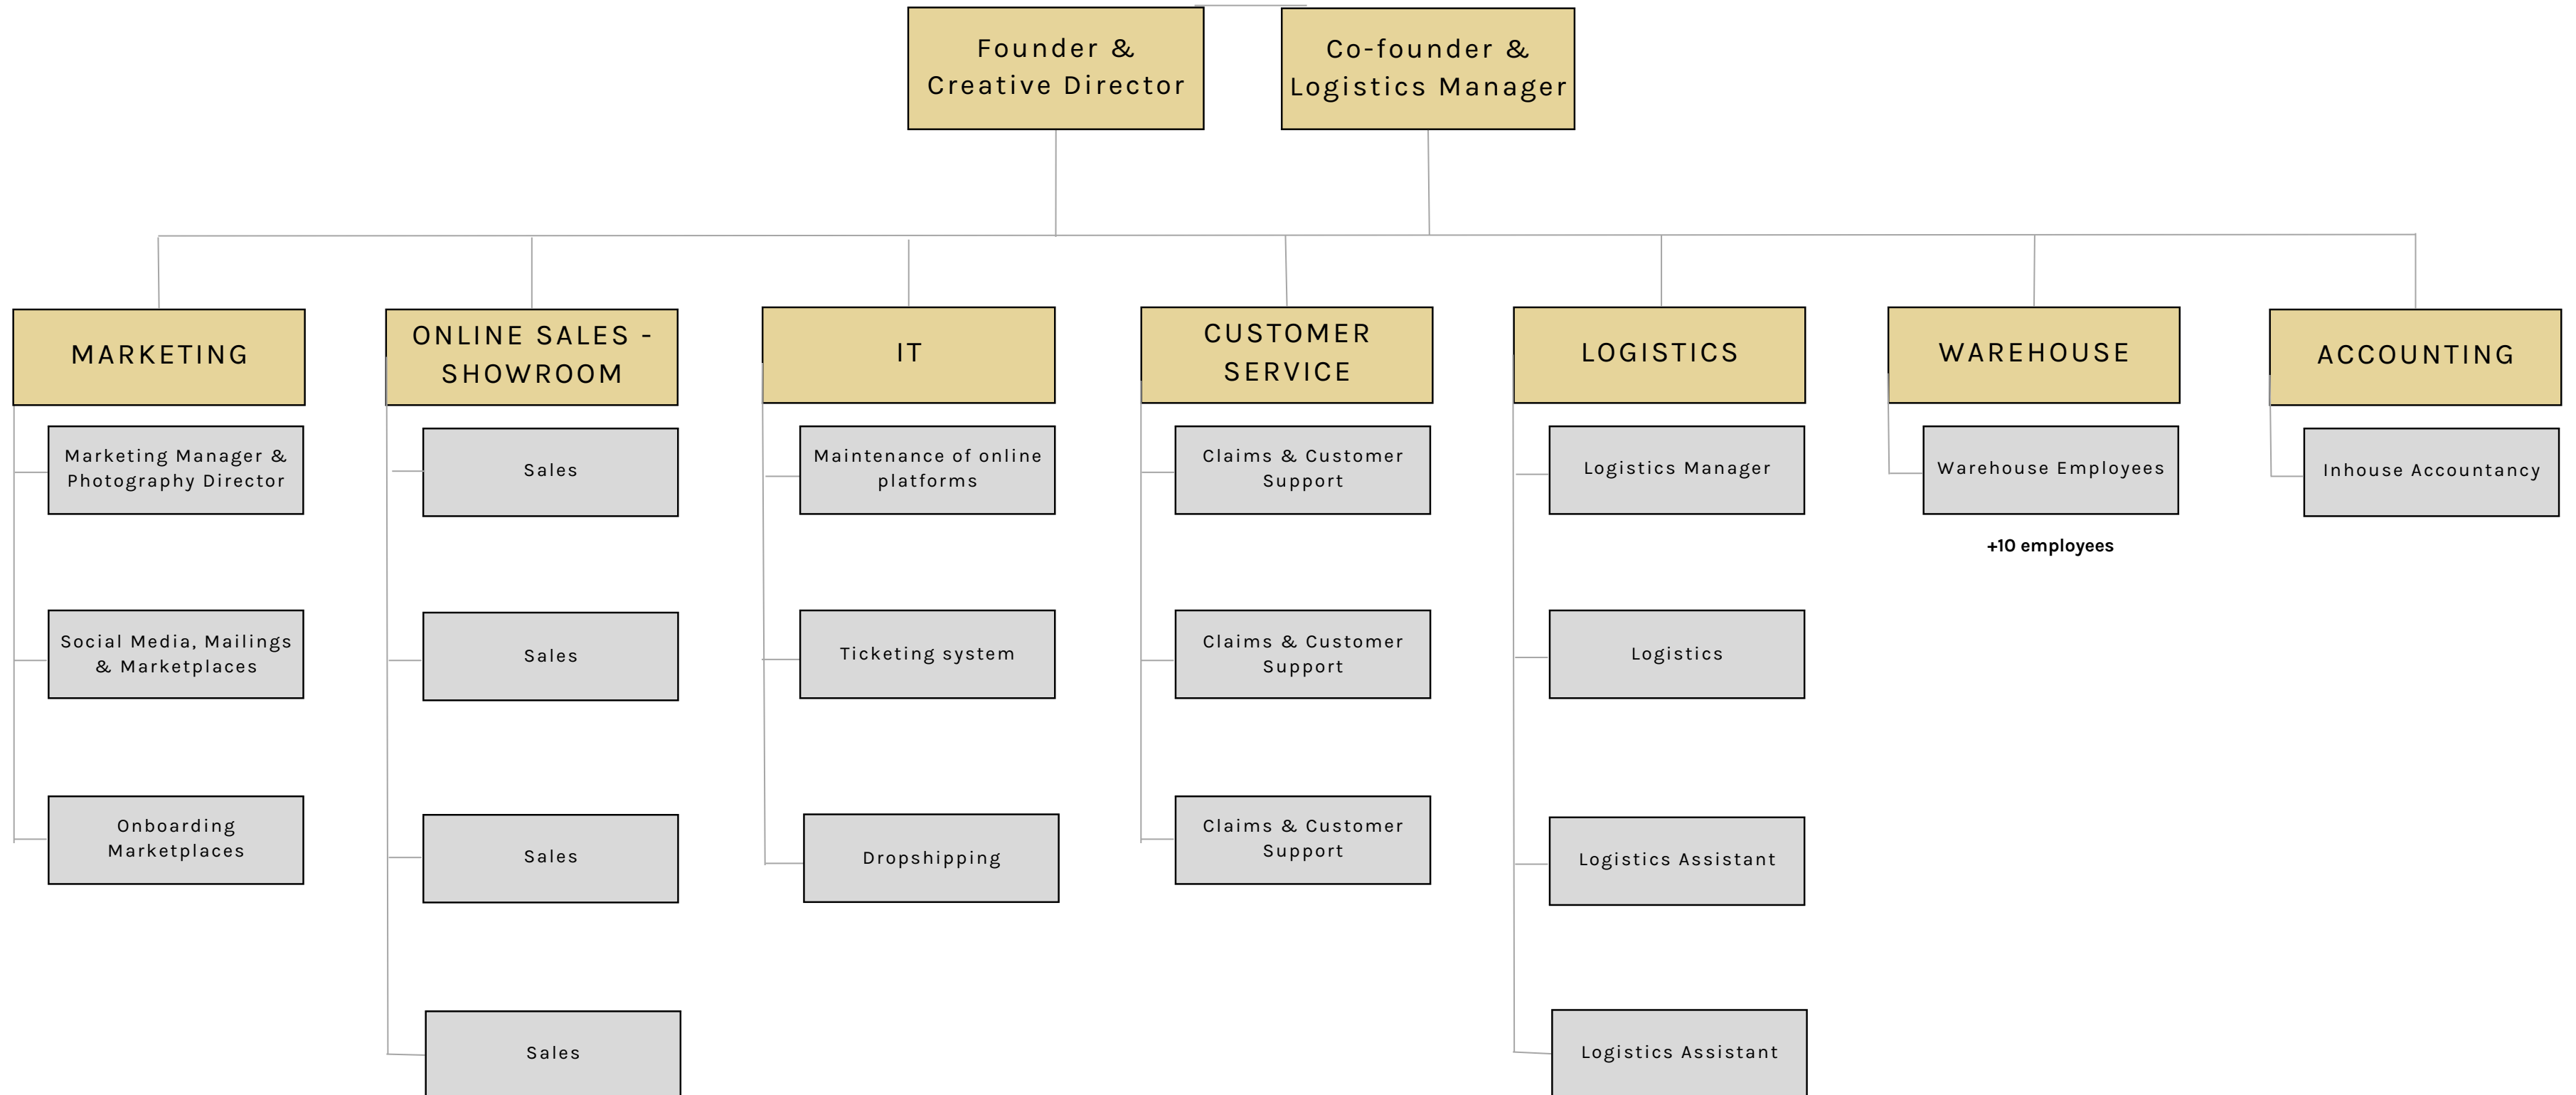

SUSTAINABILITY

We commit ourselves to encourage a sustainable way of living by choosing only sustainably and ethically sourced, natural materials, that are recycled, recyclable and eco-friendly.

Some of the natural fibers we use for the production of our designs include seagrass, water hyacinth, grass, rattan, bamboo, cotton, shells and reclaimed wood.

We opt for materials that have a minimal impact on the environment and create little or no waste. Therefore we do not use chemicals or toxins during the processing and treatment of our products.
