New

LES JARDINS®
AIX-EN-PROVENCE

Made in France solar lighting

This season, LES JARDINS® launches a new range of French solar-powered luminaires. Manufactured in Aix-en-Provence, the story begins with a meeting between original design and innovative solar technology, and the two come together to create a range of solar luminaires halfway between craftsmanship and industrial production. From table lamps to floor lamps, a new recycled & recyclable collection that makes sense with LES JARDINS® solar modules!

PALOMA table solar lightng

ts swirling design envelops us in shimmering light. The lampshade shines brightly to illuminate the table or end of the sofa. Made from sustainable materials: epoxy-painted aluminum and UV-resistant recycled PETG, the lamp diffuses a soft, enveloping (2700 K = warm white) yet illuminating light. Behind this apparent simplicity lies a wealth of technology. Thanks to its intelligent solar module, the lamp is completely self-sufficient, with a long operating time (up to 200 h).

Lampe de table
D. 16 X 28 cm

Disponible Mars 2024

ROMY&HUGO solar lighting lamp

These two solar lamps revisit the traditional fabric shade. Made from sustainable materials: epoxy-painted aluminum and recycled, UV-resistant PETG, the lamp diffuses a soft, enveloping (2700 K = warm white) yet illuminating light. Behind this apparent simplicity lies a wealth of technology. Thanks to its intelligent solar module, the lamp is completely self-sufficient, with a long operating time (up to 200 h).

Lampadaire
44 x 44 x 160 cm

Lampe à poser
23 x 23 x 50 cm

Disponible Mars 2024
