ENDLESS WALL LAMP

Introducing the Endless Wall Lamp

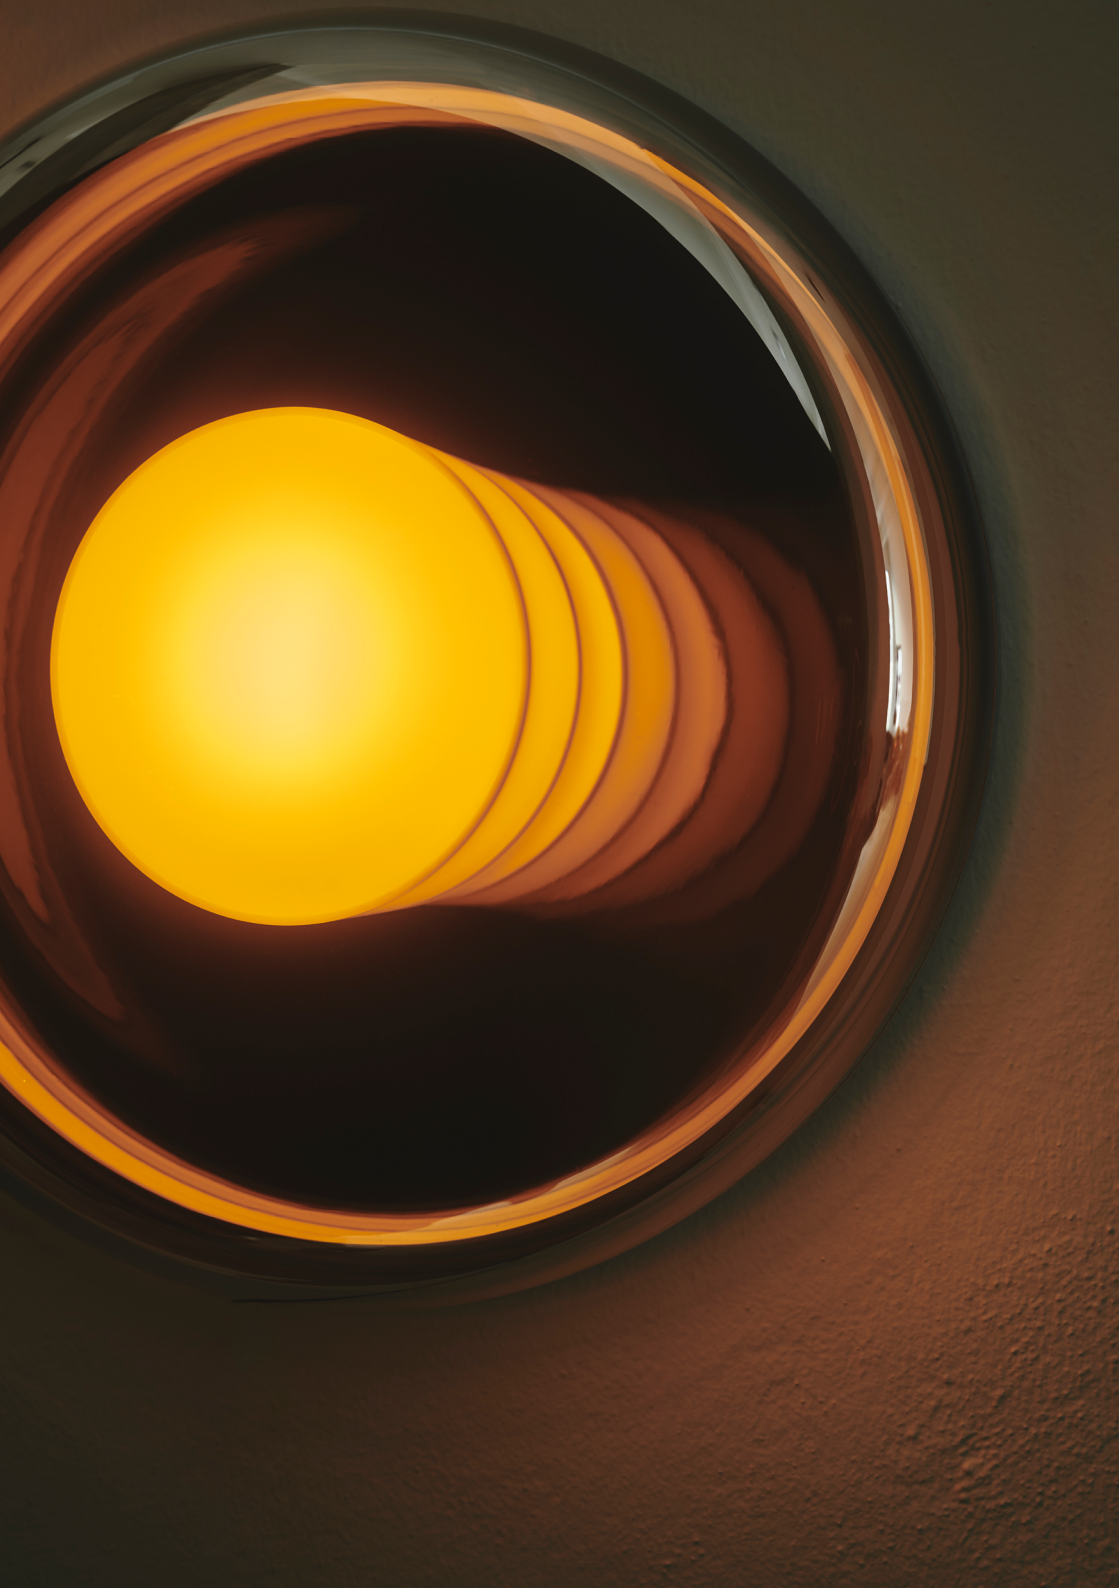
With its sleek design and a mirror front, the Endless Wall Lamp transcends the ordinary, becoming a mesmerizing beacon of innovation and illumination.

A radiant fusion of form and function.

With its exquisite design and a front adorned with a reflective mirror, the Endless Wall Lamp is a visionary creation that transcends the boundaries of traditional lighting.

The mirror's inclusion isn't just ornamental; it's a deliberate choice to create an immersive experience as the front of the Endless Wall Lamp serves as a reflective canvas, amplifying radiant luminosity and creating an illusion of infinite radiance as light emanates from within.

Crafted with precision, the Endless Wall Lamp embodies a modern aesthetic, seamlessly blending into any space. The mirror front not only adds a touch of glamour but also serves a dual purpose by visually expanding the space it occupies.



Endless Wall Lamp facts

The Endless Wall Lamp is an infinity mirror made as an IP54 rated designer lamp. The mouth blown outer glass both acts as a distorted mirror when the lamp is turned off and transforms into a deep tunnel of light when the lamp is turned on.

About Design by Us

Design by Us was established in 1999 in Copenhagen, Denmark by Rasmus Larsson as a playground for imaginative and untraditional approaches to how lighting and interior designs should be created.

Today, we have our own design vocabulary and our inspiration is derived from fashion and fantasy along with a great dose of humor and curiosity. We are all about challenging your perception of design – turn the obvious upside down and twist it.

We create captivating visual experiences that present boundless possibilities for personal expression in interior design. Our source of inspiration is multidimensional and maybe that is why we are not easily defined.

We salute the entrepreneurial spirit and the idea of following the desire to create. Our design philosophy is to make designs that serves as bold focal points and adding a touch of drama to a minimalist setting. Alternatively, they can harmonize with their surroundings, blending seamlessly into an eclectic mix of vibrant environments.
