The Il Fanale Group presents four new collections at the thirtieth edition of Maison et Objet in Paris

Il Fanale Group, an Italian company and a benchmark in the field of tailored decorative lighting, announces the preview presentation of its new collections at the thirtieth edition of **Maison et Objet**, scheduled in **Paris from January 18 to 22, 2024**. The collections, **Massira, Grid, Horizon and Foam** embody the elegance, versatility, and innovation that now characterize the brand.

With over forty years of history, the company has evolved, tracing its path on a journey to discover the Mediterranean. A Mediterranean composed of collections that evoke shapes, patterns, and colors, the result of a cultural blend nourished by the traditions and wisdom of the various peoples embracing this sea. Ancient knowledge shapes the material, and with great craftsmanship, gives life to contemporary lighting infused with experience and emotions.

Massira design by Studio Zazi: Tradition and innovation in the art of lighting
Massira, a meeting between the timeless charm of Morocco and contemporary innovation, a unique dialogue between tradition and modernity. Developed in collaboration with Studio Zazi, Massira stands out in the lighting sector thanks to the use of a particular technique of binding brass, a tailoring process once used to create cathedral stained glass windows, which elegantly blends with the insertion of micro-perforated metal sheet, giving the forms a contemporary character. The combination of different materials creates a harmony of textures and transparencies, making Massira a celebration of tradition reinterpreted with current tastes.

Grid design by DT Studio: Decorative outdoor lighting
Grid, with its range of outdoor floor and wall lanterns, surprises with its refinement and decorative use of perforated sheet metal. The peculiarity of Grid lies in the cutting of a pattern inspired by the geometries of the Mediterranean world. This element, while emphasizing contemporary design, adds a refined decorative touch, creating a play of lights and shadows. The choice to incorporate an integrated LED ensures efficient lighting while maintaining aesthetic cleanliness.

Horizon design by DT Studio: Harmony between horizon and light
Horizon, the collection of indoor lamps inspired by the fusion of sea and sky. With precious materials such as brass and frosted white glass, and an integrated 2700K LED, Horizon allows the creation of combinations of 1 or more pendant lamps to create cascades of light for personalized atmospheres. This is made possible thanks to different cable lengths and the availability of various accessories, also allowing the conversion from a wall fixture to a pendant.

Foam design by DT Studio: Elegance and functionality for the bathroom
The Foam collection combines functionality and design to transform the bathroom into a luxury space. Its name is a clear reference to exploring forms that come to life with the magic of soap foam, precisely because it is a range oriented to expand over time. The choice of different finishes and shapes ensures a refined aesthetic, and the IP44 rating guarantees compliance for installation in a humid environment such as the bathroom.

Il Fanale Group invites all design and lighting enthusiasts to visit their booth at **Pavilion 6, Stand I (i) 78 at Maison et Objet** to get a close look at these extraordinary collections that embody beauty, functionality, and innovation.
