

PRESS RELEASE

**TOUCH-MeL presents the new GARDEN and CORALLO matt collections**

Emporio Zani has chosen **Paris** to present, in preview at **Maison & Objet**, the new **Touch-MeL melamine** collections, **GARDEN** and **CORALLO**, available in **shops from March and May 2024** respectively.

**GARDEN** proposes an exotic floral motif, a flourish of colour with warm tones and details reminiscent of Victorian-era naturalistic designs. The classic floral decoration thus becomes modern and striking, for a total look effect that can liven up even the dullest table. A secret garden in which to lose yourself every day and to amaze your guests with.

**CORALLO** boldly responds in an audacious manner to the strong demand to introduce a clearly marine decoration among the Touch-MeL collection. Among marine decorations, it stands out for the elegance of its design and notes of blue, made even more precious and topical by the choice of gold (for the colouring of the coral itself). A ray of light that plunges into the sea and illuminates its depths.

Two **new decorations** that bring with them a technological innovation, thanks to the matt satin finish that gives these melamine plates a warmth and naturalness that is unique on the market.

An icon on tables all over Europe and a benchmark on the melamine tableware market thanks to the high quality of its production and the constant search for textures and colours that anticipate trends, Touch-MeL continues its ideal journey through the world of tableware and decorations, reinterpreting two classic themes such as floral and marine decorations in a whole new way.

Garden and Corallo, the new Touch-MeL melamine collections, are composed of plates (dinner plate, soup plate and fruit plate), medium bowl, salad bowl, large rectangular tray, small rectangular tray and large oval tray.
