

LES JARDINS
AIX-EN-PROVENCE

DESIGNER OF OUTDOOR FURNITURE & SOLAR LIGHTING

We're passionate about what we do.Creating and delivering customized solutions for each and every one of our customers is what motivates us every day. This new season marks the beginning of an era of new products, with collections rich in materials and design.

Since 1991, we have made three main commitments to improve our offering.

Design and responsibility
Although most of our teak products are not made in France, we strive to adopt eco-responsible practices:
• Our plantation teak comes from Indonesia and is sourced from certified, sustainable forests.
• We give preference to French or European suppliers wherever possible.
• We ask our suppliers to guarantee working conditions and wages that comply with standards, and are often above average.

Comfort and durability
We believe in the durability of our products. 80% of our products can be disassembled and repaired, extending their lifespan and reducing consumption. We encourage you to contact us to extend the life of your furniture!

CADIX, THE NEW SOLAR LAMP COLLECTION FROM LES JARDINS®.
Equipped with i-500lm solar module High performance and Smart solar

*** Design and materials:**
CADIX solar lamps, with their white mesh covering, combine sobriety and refinement. Their minimalist design is enhanced by a mesh pattern, which diffuses a warm, vibrant light.

Made from sustainable materials, these lamps combine a polyester powder-coated aluminum body with a granite base, guaranteeing both sturdiness and longevity.Equipped with a high-performance 500 lumen solar module, these lamps automatically adapt their light intensity to daily and seasonal conditions, ensuring optimal solar lighting in all circumstances.

The solar modules, designed with state-of-the-art components, are upgradeable and repairable, guaranteeing enhanced durability.

Thanks to their autonomous, hands-free operation, these lamps offer a simple, effective lighting solution for any outdoor environment.
