

A personal home

The new collection for Spring/Summer 2025 celebrates the personal home and the contrasts between soft, organic shapes and strict geometric lines. This balance makes the decor dynamic and exciting that feels both nostalgic and contemporary. A timeless interior that goes beyond temporary trends.

“This Spring Chhatwal & Jonsson draws inspiration from its own history. The ambition from the first season has been to design textiles that have a timeless quality and the ability to surpass trends. Patterns and colours, with a touch of nostalgia, are renewed to fit into a modern and personal style. A contrasting interior where old meets new, with influences from Scandinavia and internationally” says Stig Jonsson Creative Director, Chhatwal & Jonsson.

With sustainability in focus all our products in the collection are made from 100% natural materials like linen, wool and cotton.

Lime Green is the new colour for the season adding an energetic feel to the room. A contrast with neutral tones yet in harmony with natural elements like wood and plants.

The collection is available for sale at www.chhatwal-jonsson.com and at selected retailers worldwide from January 2025.
