## Who are we?

A mother and daughter, both talented in product design and the creation of decorative objects.

They combined their skills to give life to a collection of weathervanes in March 2020. Inspired by the wind and childhood memories, they create the Ritournailles, artistic weathervanes with bright colors and significant personalities, evoking the enchanted universe of the gardens of their native Brittany.

## A big family

The Ritournailles are poised for their directors to set off on a tour, performing comedy in gardens, on terraces and from balconies.

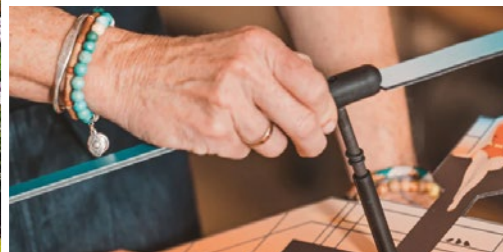

They indicate poetically and joyfully the direction and intensity of the wind. They trigger surprise, contemplation, fun and are the stars of the filming location.

We collaborate with illustrators from here and elsewhere.

They are both in one with a different design on the front and back.

They are designed and assembled in Saint-Malo, France
