ZAFFERANO at MAISON & OBJET, Paris / January 2026

At Maison & Objet, the Italian brand Zafferano - known for its creative collections and bold use of color - unveils its latest innovations: tableware, lighting solutions, and new battery-powered lamps featuring the brand's distinctive style.

CONOSFERA design Federico de Majo

Essential lines and sophisticated transparencies define Conosfera, a collection of vases in hand-blown, **handcrafted borosilicate glass**. The design plays on the encounter of two differently colored volumes, fused together using the “**incalmo**” technique: a colored cone that transforms into a sphere seems to float inside a transparent base, creating an effect of striking visual **lightness**.

Available in three sizes and three color variants - amber, gray, and lake green - Conosfera is perfect for showcasing a single flower or a small arrangement, adding a poetic touch to your table or living space.

SAM COLLECTION design Samuele Ambrosi

Designed by bartender Samuele Ambrosi, SAM Collection is the first cocktail glasses series created by an **Italian mixologist** for an Italian brand. Hand-blown and handcrafted, these glasses combine lightness, clarity, and durability.

Each shape is carefully designed to **enhance every cocktail**, balancing aesthetics and functionality. The **radial décor** engraved on the base is inspired by citrus fruits - the symbol of mixology and the Mediterranean spirit – and embellishes every piece. A professional yet accessible collection, ideal for bars, restaurants, and for those who want to enjoy a high-level cocktail experience at home. Dishwasher safe.

TECA TASTING design Federico de Majo

In the category of **borosilicate glass tableware** featuring decorative elements embedded within the glass, Teca represents a small revolution. The distinctive decoration is enclosed within a double glass wall, enhancing its aesthetic appeal and protecting it from damage while simplifying cleaning and maintenance. This technique allows food to be placed inside the container without risk of harming the internal decoration, and the recessed “showcase” shape also makes the items stackable. *Teca Tasting* consists of **small transparent borosilicate glass plates** with four hand-crafted decorations (olive, lemon, sardine, and amber/black terrazzo). They are designed to highlight tastings of **extra virgin olive oil, tartare, anchovies, or amuse-bouches**. Diameter: 12 cm.

ANGELINA

Angelina is a battery-operated, portable, and rechargeable table lamp. Thanks to its **tilting head**, it allows you to direct the light exactly where needed, providing precise and customizable illumination – perfect for **reading**, studying, or crafts. A touch control at the bottom of the head enables power on/off, brightness adjustment (**dimming**), and **color temperature** selection (2200, 2700, 3000 K), creating the ideal atmosphere in any room. Made of painted die-cast aluminum in white, black, and red, Angelina is designed for indoor use only. It offers **10–11 hours of battery autonomy** and recharges conveniently on a contact charging base within 3–4 hours. An electronic control system monitors and displays the remaining battery life (lithium, rechargeable, and replaceable), ensuring optimal charging every time. Height: 26 cm. Retail price (incl. VAT): €119,00

DONDOLINA design Pio e Tito Toso

Dondolina is a portable, rechargeable table lamp designed for those who love a pop, playful, and **unconventional style**. Its sleek shape ends with a semi-spherical base that allows it to tilt and **always return to an upright position**, offering a dynamic yet practical effect. Made of painted aluminum with a polycarbonate diffuser, it is suitable for both **indoor and outdoor use** (IP65). The touch control on the top allows you to switch the lamp on and off, adjust the brightness to four levels, and select the color temperature (2200K, 2700K, 3000K). Equipped with a rechargeable and replaceable lithium battery, it provides up to 9 hours of autonomy at maximum power and fully recharges in 2–3 hours with the included contact charging base. Available in **five finishes** (matte white, titanium, red, bronze, and matte gold), Dondolina is a cordless lamp that combines style, innovation, and movement to light up any space with personality. Height: 37,6 cm. Retail price (incl. VAT): € 170,80

POLDINA REVERSO SOLAR L RF

Poldina Reverso Solar is a **portable** floor lamp that combines smart technology, functional design, and complete freedom of use.

Cordless and independent from any power connection, it is equipped with a **solar panel** but can also be recharged using a USB Type-C cable. The base includes two integrated **containers** that can serve a practical function (e.g., **planters, ice buckets or storage bins**) or a decorative one (filled with sand, stones, etc.). Designed for both indoor and outdoor use (IP65), it is made of molded plastic and painted aluminum.

The lamp also includes **dusk and motion sensors** that automatically activate and adjust the light based on ambient brightness and presence detection.

The LED lighting can be **controlled manually or remotely** via radio frequency (remote control is included). The **brightness** can be adjusted to 4 levels. Likewise, the **color temperature** can be selected from 4 preset values (2200K, 2700K, 3000K, 4000K).

Height: 156 cm. Retail price (incl. VAT): € 1140

FILO design Federico de Majo

Essential, ironic, immediate: Filo is a collection of mains-powered **indoor** lamps, designed to trace a gesture in space. The collection includes wall models (in two sizes), table lamps (with base or clamp), and a floor version.

Each one features a painted metal structure, available in three matte finishes – **red, white, or black** – with an upper arch that can be **rotated** up to 200°.

All models are supplied with a **specially designed LED E27 bulb** with a matching cover.

The LED is embedded in a silicone dome that acts as a lens, directing the light downwards and ensuring excellent illumination of the surface, without lateral glare. The result is a **comfortable, directional light**, perfect for everyday activities.

Every detail has been carefully studied: for example, a small weight is integrated into the light source to keep the cable perfectly taut. Filo is both **functional and decorative**, adding character to interiors with **lightness**, and embodying – simply and intelligently – Zafferano's purpose: *We bring joy into everyday life.*

Retail price (incl. VAT): starting from € 217,00

TREE OF LIGHT design Tomaso Schiaffino

The Tree of Light floor lamp features an evocative design and a bold, **scenic presence**.

The painted metal and polyethylene structure comes in three colors: white, black, and sage green. The opal polyethylene diffusers resemble the stylized crown of a tree, casting a **soft and enveloping light**, ideal for residential, hospitality, or contract settings. The lamp is fitted with high-power E27 LED bulbs, offering effective illumination **even outdoors**. With its balance of function and visual impact, the Tree of Light floor lamp is perfect for lighting up both indoor and covered outdoor spaces such as **terraces, patios, and porches**.

Height: 185 cm. Retail price (incl. VAT): € 1085
