

PROMI DESIGN ARRIVES IN FRANCE: WHERE WOODEN ELEGANCE COMES TO LIFE

France welcomes a fresh new voice in the world of design: Promi Design, a Lithuanian studio where wood, craftsmanship, and humor meet.

Born on the shores of the Baltic Sea, the brand stands out with a minimalist, playful, and deeply human approach. Every object – from sculpted bird feeders to pet barriers, from piggy banks to cutting boards – is designed to spark imagination and infuse interiors with simple yet striking poetry.

Clean lines. Sustainable materials. A hint of wit. Promi Design represents a new generation of responsible creators, blending aesthetics with environmental consciousness. Each piece is crafted from natural, sustainably sourced wood, laser-cut with surgical precision, and hand-assembled with exceptional care.

Already a favorite in Nordic countries, the brand is now launching in France with a clear ambition: to offer concept stores, interior designers, design lovers, and neighborhood boutiques a fresh, responsible, and character-filled alternative.

Available from September in top French retailers and at professional trade shows.
