

## KAM – Time Takes Shape in Interior Design

*A bespoke wall clock system, artisanal and 100% Made in Italy, designed for architects and interior designers.*

CalleaDesign presents **KAM**, a concept that transforms the wall clock into a true element of interior architecture. More than a collection, KAM is a creative map offering professionals the freedom to design a unique piece, perfectly integrated into their project.

Handcrafted in our workshop in Trieste, each KAM stands out for its pure lines, harmonious proportions, and carefully selected materials. Its open, modular structure allows full customization of every detail — colors, finishes, movement, engraving — **with over 45 million possible combinations.**

The system unfolds in four paths: **KAM Origine** for total customization, **KAM Visions** with thematic proposals curated by designers, **KAM Limited Editions** in numbered series, and **KAM Unico** for bespoke projects, including non-standard formats.

With KAM, time is not just indicated — it becomes a design gesture, carrying identity and meaning, serving exceptional interiors.

### About CalleaDesign

For over 50 years, CalleaDesign has been designing and manufacturing high-end wall clocks and decorative objects in Trieste, blending Italian design, artisanal know-how, and innovation. Each piece is the result of meticulous work, where technical precision meets the elegance of form and material.
