# Redefining the Globe

# About

Orbis Terrae is a globe manufacturer founded in 2017 by Gaël Gaborel, who transitioned from aeronautical engineer to passionate craftsman.

His workshop revives a centuries-old tradition that had fallen into decline, bringing a resolutely modern approach to design and production. Each globe is a unique, handcrafted piece, personalised for each of our customers.

We believe that beauty lies in precision. Every map, every finish, every detail is designed to create exceptional pieces that transcend their primary function to become true decorative art objects.

# Earthly and Heavenly

Made from plaster, the spheres are delicately covered with paper gores, onto which our cartography is printed. Next comes the watercolour painting stage, to highlight the relief's shadows, vegetation and custom illustrations.

## 4 sizes

The 22 cm desktop

The versatile 36 cm diameter

The sizable 60 cm

The Impressive 80 cm

## Beyond the horizon ...

The Moon, Mars and the Constellations
