In Pollestres, in the Pyrénées-Orientales region, Atelier Ecogreen brings nature back to life in a sustainable and elegant way.

Founded by Marlène Brial, a passionate artisan, she handcrafts preserved plant decorations: green walls, acoustic panels, logos, and custom compositions. Preserved plants, 100% natural and maintenance-free, become a true design material.

Each piece is designed to enhance professional spaces, hotels, offices, shops, and restaurants, combining well-being, aesthetics, and sustainability.

In her studio, Marlène creates green walls, logos, acoustic panels, and custom compositions for professional spaces: offices, hotels, restaurants, retail stores, and healthcare facilities. Her creations bring a strong visual signature while reflecting an eco-responsible and contemporary approach.

This year, Atelier Ecogreen is turning a new page with the launch of its online store, offering a collection of standard pieces: plant-based paintings, geometric shapes, and decorative objects, all handmade in France. A way to offer everyone the opportunity to incorporate a little nature into their daily lives, with the unique signature of modern and responsible craftsmanship.

“I WANT NATURE TO BE INVITED INTO LIVING AND WORKING SPACES, TO SOOTHE, INSPIRE AND EMPOWER THOSE WHO WORK THERE.”
