

ARTISAN[®]

PRESS RELEASE - M&O 2026

The Artisan factory emerged from the traditional woodwork shop Ćostović, which conveyed all its love towards wood and 50-year experience of woodprocessing into it. We acquired our first experiences by producing furniture for Dutch and British designers, and we started our own first collection in collaboration with the regional designers in 2007.

Driven by our passion for wood, we work with the top local and international designers who are familiar with our technological advantages and who understand how to translate the expertise into a vision that is worthy of this precious material. We employ our artisans' hands as our primary manufacturing tools because we aim to invest our love for wood into our products. The Artisan craftsmen are masters of transforming the designers' ideas into one-of-a-kind handcraft.

Our love for wood

"We love wood because we have known it our entire life. From the forest, we played in as children, to the calling to which we have dedicated our adulthood. We produce furniture because we love wood, and we want to share this love with you, with those who appreciate fine woodworking and furnishings of the highest quality."

Founder Fadil Ćostović

For the Maison & Objet 2026 edition, we are proud to present our new collection, showcasing for the first time the products that will define Artisan's vision for 2026.

This year, we introduce fresh variations of our iconic designs, such as the Column table and Monument mirrors, alongside new interpretations like the Fin extension table in a square-top version. In addition to these evolutions, the collection brings entirely new creations: the Nila Collection, featuring a chaise lounge and two armchairs, complemented by a versatile shelving system that doubles as a room divider.

We also unveil the Oskar console and table, first introduced at M&O now presented in a refined smoked oak finish. Completing the line-up is the Bloop sideboard, a bold yet elegant addition that redefines storage with fluid geometry and meticulous craftsmanship.

Each piece reflects Artisan's dedication to timeless design, technical precision, and the beauty of solid wood.

This collection is not just a continuation, it is a statement of innovation and artistry, designed to elevate contemporary interiors with character and soul.

Nila Lounge Collection

The Nila Lounge Collection embodies Artisan's mastery in furniture design, with the chaise lounge as its centerpiece. Defined by a pronounced orthogonal structure supporting an organic form, this piece strikes a balance between strength and elegance.

Its refined wooden frame and distinctively shaped armrests create a unique visual identity, while soft transitions and a sense of lightness lend a timeless appeal. The upholstered seat rests on a leather base, featuring woven details that provide structural reinforcement where needed, an interplay of technical precision and poetic expression. Subtle metal accents serve both as decorative elements and structural components. Their gently curved lines complete the silhouette, adding visual emphasis and strength.

NILA LOUNGE HIGH

NILA LOUNGE TRIMMED

NILA CHAISE LOUNGE

Nila Shelving System

The Nila shelving system is a series of light, airy display units designed to complement modern spaces. Vertical supports blend seamlessly into the upper and lower boards, creating soft transitions and a harmonious structure.

Floating shelves emphasize visual lightness, while the interplay between solid surfaces and open space offers a versatile canvas for creative compositions. Perfect as a room divider or a standalone feature, the Nila shelving system brings both function and aesthetic refinement.

Oskar Collection

The Oskar Collection includes tables and consoles crafted from solid wood, distinguished by sculptural legs inspired by modernist column designs from Brasília. Fluid transitions between horizontal and vertical elements create an architectural silhouette that is both dignified and understated.

Each piece is made from carefully selected solid wood, precisely milled and finished by Artisan's skilled craftsmen. The design incorporates knock-down construction for convenient transport without compromising stability.

Tables feature an oval-shaped tabletop with a prominent seating position on one side, subtly suggesting social hierarchy in a positive and respectful way.

Consoles derive from the table design, using the wall as a section plane that reveals and utilizes the H-shaped support element. Presented in Milan and now available in a refined smoked oak finish, the Oskar Collection is a testament to timeless design and craftsmanship.

OSKAR TABLE

OSKAR CONSOLE

Fin Extension Table Square

The Fin extension table exemplifies seamless functionality paired with elegant design. Originally introduced with a round tabletop, this signature piece is equipped with a precision-engineered mechanism that enables smooth, tool-free extension and retraction.

New for 2026: Building on the success of the original round design, the Fin extension table now comes in a striking variation with a square-shaped tabletop, offering a fresh interpretation of this iconic model while maintaining its technical excellence and timeless appeal.

Neva Sofa Dining

The Neva Sofa Dining brings the elegance and comfort of the Neva sofa into the dining space. Retaining the signature organic lines and refined craftsmanship of the original design, this dining variant offers a harmonious blend of style and functionality, ensuring a luxurious dining experience.

Bloop Sideboard

The Bloop sideboard reinterprets the classic sideboard with a softer, more fluid geometry. Rounded front panels rise seamlessly to meet the frame, creating a distinctive graphic character. The curved junction between the front panels and the storage unit reflects Artisan's meticulous attention to detail and the technically demanding manufacturing process, perfected through hand finishing. This piece combines elegance and functionality, making it a statement element in any contemporary interior.

Column Table

The Column table is a statement piece with a robust yet refined form, ideal for both residential and commercial spaces. Its distinctive base transitions seamlessly from a square to a circle, creating a sculptural and dynamic presence. Carefully balanced proportions enhance both aesthetics and functionality, making it a striking yet practical addition to any interior.

New for 2026: The collection introduces exciting variations of the Column table, including a single-base oval version and the Column Oval Double Base. These new interpretations preserve the iconic character of the original design while offering versatile options as statement pieces for diverse interiors.
