A luminous debut: Porcel launches “Flare” at Ambiente Frankfurt 2026

Porcel introduces Flare, its latest fine porcelain collection, defined by a luminous, contemporary, and harmonious aesthetic. Inspired by the harmony of spirals, Flare captures the subtle movement of light as it expands and dissolves, revealing compositions of delicate golden lines over soft beige tones.

This collection was born from the desire to create a versatile and timeless porcelain line that unites tradition and modernity, expanding Porcel’s universe through a minimalist and sophisticated language. The contrast between light and dark tones adds depth and rhythm, evoking the perfect balance between energy and serenity.

The metallic golden lines that flow across the surface are complemented by hand-painted gold rim detailing. The shape of each piece reinforces the collection’s classic and refined character, resulting in porcelain where brilliance and luxury are expressed through subtlety.

Flare will make its official debut at Ambiente Frankfurt 2026, the leading international event for the tableware industry. Also on display will be one of Porcel’s most recent collections. Launched in September, Ruby combines burgundy and gold on fine porcelain, creating reflections that evoke a polished jewel.

Discover these and other Porcel collections, along with a portfolio of innovative techniques, in Hall 12.1, Stand B67, from February 6–10.
