SILHOUETTE

WINTER 2027

Quiet drama.
Pure form.
Crystal as silhouette.

In the haze between shadow and light, Silhouette emerges as a study of form, glamour and illusion.

Inspired by the visual language of 1970s fashion photography and the decadent art scene surrounding it, the collection captures a moment suspended in atmosphere — where reflections dissolve into monochrome moods and crystal becomes pure sensation. Clear surfaces, softened by subtle hidden tones, create objects that appear almost immaterial; sculptural presences shaped by light itself.

Graphic lines collide with sensual curves in compositions that feel cinematic, provocative and unapologetically elegant.

Part object, part performance, Silhouette explores the tension between architecture and desire. A collection where glamour is stripped back to its essence and reduced to reflection, contour and attitude.

REFLECTIONS COPENHAGEN

A wavering contour cast in crystal. Fluted glass rises into a soft, undulating silhouette — part vessel, part gesture, frozen mid-movement between architecture and air.
