KIDYWOLF unveils KIDYDRAW PAD

Creativity takes on a new form

KIDYWOLF expands its creative universe with **KIDYDRAW PAD**, its new backlit drawing tablet designed to inspire children to draw and create on their own.

Slim, lightweight and portable, it makes tracing easy: children simply place a template under a sheet of paper and follow the lines visible through it. With 3 brightness levels and 30 illustrations to reproduce, they can progress at their own pace and watch their drawings take shape.

With **KIDYDRAW PAD**, **KIDYWOLF** continues its mission to create intuitive, beautifully designed toys that encourage children to explore their creativity away from screens.

A new addition to the KIDYDRAW family, alongside **KIDYDRAW MINI** and **KIDYDRAW PRO**.

"With KIDYDRAW PAD, we wanted to create a product that is creative, portable and truly intuitive. Something children will want to take everywhere, and above all, that gives them the pride of watching their own drawings come to life."

— Gary Garnier, KIDYWOLF

THE KIDYDRAW UNIVERSE

Drawing in all its forms.

Backlit or LCD, KIDYDRAW drawing tablets are designed to nurture children's creativity and love of drawing, at home or on the go.

KIDYDRAW MINI, compact and portable, is perfect for first creations. **KIDYDRAW PAD** uses light to make tracing easy and intuitive, while **KIDYDRAW PRO**, with its large A4 format, opens the door to more detailed drawings and new creative worlds.

Three formats, three experiences for different ages, all with the same rewarding feeling: **watching a drawing come to life under their own hands.**
