sashaxsasha

sashaxsasha is a design duo based in Paris, France. Originally from Moscow, Alexandra (Sasha) Gineva and Alexander (Sasha) Dobrovskiy studied architecture in Ghent, Belgium.

In 2013, they launched their architecture practice, Masterskaya Be, and in 2019 expanded their vision with sashaxsasha, a studio dedicated to product design. From the outset, Sasha and Sasha have drawn inspiration from contemporary and classic art, using it as a reference in their private and public commissions.

Today the studio is working in both worlds – architecture and product design. With sashaxsasha, the duo distils their rich visual library to create objects that are at once playful and monumental, each piece a homage to their diverse background and memories.
